Windows 8.1 (Mobile)
Setup Guide

This is a configuration guide for connecting Windows 8.1 phones to the new Leeds Beckett ***eduroam*** wireless network.

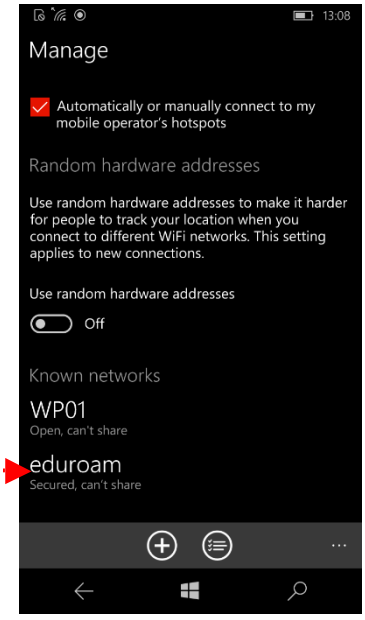
During 2016, the wireless service at Leeds Beckett is being upgraded, which means that existing ***eduroam*** users will need to undertake steps to re-connect to the new ***eduroam***, in addition to users that are new to our University. The steps below outline the required process for both user types.

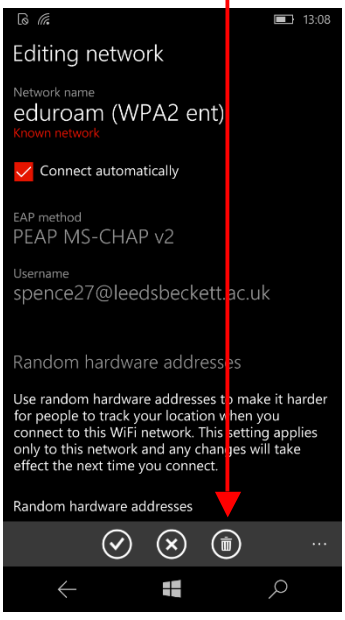
For more information on the wireless service, please visit: http://www.leedsbeckett.ac.uk/wireless

Please note: the screen shots provided below may be differ in appearance on your device, though the steps required will be the same to enable a wireless connection.

Existing staff and students, please start at step 1.
New staff and students, please start at step 4.

1. You need to forget the old network to enable connection to the new service. To forget the network, please go to
   Settings > WiFi > Manage
2. Select 'Eduroam'
3. Select the Trash Icon -





4. To connect to the new network, please go to
   Settings > WiFi
5. If Visitor Wi-Fi is connected, select that option Select
6. 'Forget This Network'.

7. Select 'Eduroam'
8. When prompted for credentials enter your University username appended with **@leedsbeckett.ac.uk**.
   (Students - e.g. c123456@leedsbeckett.ac.uk;
   Staff – e.g. surname01@leedsbeckett.ac.uk)
   Enter your normal University password and select 'Done'.
