

BA (Hons) Filmmaking

Digital Portfolio Guidance

To make your portfolio stand out, we're looking for evidence of **artistic and creative ability**. Even if you haven't studied filmmaking before, you should still prepare original work to include with your submission. We understand that you may not have studied filmmaking as part of your current or previous studies but you should be prepared to supply us with items of original creative work as part of a portfolio submission.

Your portfolio should be submitted electronically. You can choose any **one submission** from the list below. If you submit more than one item, we will randomly choose to view just one piece of work.

- An online link to 5 min selection of a film/films you have made or a show reel of your work. You should also include a short written explanation of your work, from its inception to its completion, including an explanation of the roles you have undertaken in this/these film/s (100 - 200 words).
- A sample of creative writing – no longer than 5 pages. This can be in the form of a script, short story, fiction extract, play or drama extract, selection of poems or any other creative writing. Traditional essays are not considered to be creative writing.
- A portfolio of no more than 5 reproductions of any art or design work, photography or visual material (drawing, painting, magazine images etc.). This can include any combination of the above or can feature only one type of work. We are not looking for variety here but quality.

The submissions should be in digital form (**PDF File**) for images and scripts or in the form of an online link for a video. The submission should **not exceed 5Mb** of total file size. No hard copies can be accepted by post.

You'll have **21 days** from the date of our request to upload your digital portfolio. No hard copies can be accepted by post.

Once you're ready to submit your portfolio you should do this through our [online portal](#)

You'll be notified of the outcome of your application through your [UCAS Hub](#)
