

LEEDS
BECKETT
UNIVERSITY

Course Specification MA Design for Change

Course Code: MDECH

2026/27

Award and Title: MA Design for Change (MDECH)

Applicant Facing Course Specification for 2026/27 Entrants

Confirmed at 11/2025

General Information

Award	MA Design for Change
Contained awards	Postgraduate Diploma Design for Change Postgraduate Certificate Design for Change
Awarding body	Leeds Beckett University
Level of qualification and credits	Level 7 of the Framework for Higher Education Qualifications, with 180 credit points at Level 7 of the Higher Education Credit Framework for England.
Course lengths and standard timescales	Start dates will be notified to students via their offer letter. The length and mode of delivery of the course is: <ul style="list-style-type: none">• 12 months (full time, campus based)• 24 months (part time, campus based)
Part time study	PT delivery is usually at half the intensity of the FT equivalent course, although there may be flexibility to increase your pace of study to shorten the overall course duration. Some modules may be delivered in a different sequence from that defined within this information set but the modules offered within each level are consistent. Please note that a work placement option is not generally available to PT students.
Location(s) of delivery	The majority of teaching will be at City campus but on occasion may be at Headingley campus.
Entry requirements	Admissions criteria are confirmed in your offer letter. Details of how the University recognises prior learning and supports credit transfer are located here: https://www.leedsbeckett.ac.uk/student-information/course-information/recognition-of-prior-learning/ Admissions enquiries may be directed to: AdmissionsEnquiries@leedsbeckett.ac.uk .
Course fees	Course fees are confirmed in your offer letter. A breakdown of any additional costs is included on the online prospectus entry for this course. Fees enquiries may be directed to Fees@leedsbeckett.ac.uk .

Policies, Standards and Regulations

<https://www.leedsbeckett.ac.uk/our-university/public-information/academic-regulations/>

Standard regulations apply to this course.

Course Overview

Aims

The aims of the programme are to:

- Provide you with opportunities to deepen and connect your research, in a critically engaged, supportive, and specialist learning environment that is responsive to the growth of your practice and professional aims.
- Support you to cultivate an approach to process and practice that fosters life-long learning, adaptability, and the capacity to anticipate and respond to change in your field.
- Enable you to devise strategies to communicate your practice, engaging diverse audiences through established and emerging networks, formats, and opportunities for dissemination and professional development.
- Enable you to situate your personal and professional positioning to activate environmental, societal, and professional agency in your field.
- Promote autonomy and proactive self-management for effective participation and contribution to a diverse learning community.

Course learning outcomes

At the end of the course, students will be able to:

1	RESEARCH and ANALYSE: Research challenging contexts to critically analyse and synthesise insights, through testing and developing your methodology.
2	CONCEPTUALISE, PROCESS and REALISE: Develop, realise, and refine your practice through advanced and sustained conceptualisation, rigorous testing, and critical evaluation, individually or collaboratively.
3	COMMUNICATE: Devise a compelling strategy to communicate your practice, engaging diverse audiences.
4	REFLECT and POSITION: Critically evaluate and situate personal and professional positioning related to environmental, societal and professional contexts and perspectives in your field.
5	ENGAGE and CONTRIBUTE: Demonstrate autonomy and pro-active self-management for effective participation and contribution to a diverse learning community.

Teaching and Learning Activities

Summary

Our Art and Design subject area values inform everything we do, and support our approach to teaching, learning, and creative practice:

Future: By staying future-focused, we help you to develop the knowledge and skills needed to succeed in a rapidly changing, digital world. We support you in planning for your future and achieving your long-term goals.

Whole-self: We support you in being genuine and true to yourself, as this authenticity fosters trust and valuable connections. We strive to create a passionate community, where you can find joy and meaning in the work you make.

Curiosity: We encourage speculative and curious play, as this leads to deeper understanding and continuous growth. By nurturing your curiosity, you can unlock new opportunities and insights, while confidently taking risks and navigating uncertainty.

Engagement: Active engagement, responsiveness, and resilience are key to overcoming challenges and achieving success. We support you in staying engaged and motivated, even in the face of adversity. By building your confidence and resilience, you can navigate obstacles and continue to thrive.

Change: By integrating ethical and sustainable practices into the way we work, we aim to minimise our environmental impact. We are committed to social justice, and using our creative skills to promote fairness, equality, and respect for all individuals.

Belonging: Our commitment to equality, diversity, and inclusion is embedded in every aspect of our delivery. We strive to create an environment where everyone feels valued and respected, regardless of their background or identity. By fostering a culture of inclusivity and respect, we ensure that all voices are heard and that everyone has the opportunity to succeed.

Each module acts as an overarching framework for embedded projects that focus on the development of studio practice, contextual studies, and professional skills. Taught sessions will include lectures, workshops, seminars, and tutorials.

Through studio practice modules, you will learn ways in which to take an iterative approach through the exploration and testing of creative and technical concepts and processes. Through creative risk taking and ideas generation, you will develop skills in reflective practice through documentation and annotation, and the confidence to be proactive in your independent learning.

Lectures will facilitate your understanding of key cultural, social, and historical issues, and awareness of responsible, ethical, and socially engaged practices.

Your awareness of the industry and skills for employability will be supported by industry professionals through, for example, visiting practitioners, live projects, and industry visits.

Seminars and workshops will teach processes involved with selecting and evaluating information from a range of perspectives, critically analysing images, objects, information, and texts, and developing the principles of academic writing to essays and reports. You will understand how to research effectively, and why it is important.

Seminars and tutorials will support development of presentation techniques, and your organisational and project planning skills.

The notional hours of each module include a requirement for independent study which takes a blended approach to guided independent study through Learning Support Specialist support, and your own self-managed study.

Courses within the Art and Design subject area make use of MyBeckett and the bespoke VLE, CAGD. A new digital space is under development, which will allow for the 'live', individual and changing nature of learning to be captured. AI will support us to bring together multiple feedback moments and filter them into a 'learning map' for students and staff. It will track key learning moments and support our students to

navigate and connect their whole learning journey. It will be a progress record for staff, who will be able to see learning beyond the confines of a module and identify points of supportive intervention, as and when required. This development will work with existing platforms.

Your modules

This information is correct for students progressing through the programme within standard timescales. Option modules listed are indicative of a typical year. There may be some variance in the availability of option modules. Students who are required to undertake repeat study may be taught alternate modules which meet the overall course learning outcomes. Details of module delivery will be provided in your timetable.

Level 7

Compulsory modules

Module title	Credits	Semester/ teaching period
Design for Change: Critical Methods	60	1
Design for Change: Advanced Project	60	2
Design for Change: Expanded Practice	60	3
Number of credits of compulsory modules	180	

Assessment and Scheduled Learning and Teaching Activities

The assessment balance and overall workload associated with this course are calculated from core modules and typical option module choices undertaken by students on the course. They have been reviewed and confirmed as representative by the Course Director, but applicants should note that the specific option choices students make may influence both assessment and workload balance.

A standard module equates to 200 notional learning hours, which may be comprised of teaching, learning and assessment, any embedded placement activities and independent study. Modules may have more than one component of assessment.

Assessment

Level 7

This course is assessed by a coursework portfolio.

Indicative Inclusive Assessment Information:

Learning outcomes will be mapped against a 'body of work' made up of different projects and responses, produced over the duration of the module. This allows for a more rounded view of performance, across a range of work and longer timeframe. It is more reflective of the creative process and the interrelated skills you will develop. It also embraces the integration of practice, contexts and professional skills which is key to our delivery. Opportunities for formative feedback are woven throughout your learning, in the form of group and individual tutorials, critiques, presentations (in-person, pre-recorded) and a plethora of reflective processes appropriate to individual specialisms. You will be able to track your progress through

your 'living assessment profile' where feedback and reflection will be captured throughout this module. Approximately halfway through the module you will take part in a 'student progress review', this is a supportive, co- designed process to support your learning journey.

The holistic and inclusive nature of assessment means that you will submit a 'body of work' that is appropriate to your subject. Your specialist project brief will outline the options of what can be submitted, see examples below.

A body of work: this may include a number of creative and or contextual outcomes, supported by research, analysis and developmental work, in response to specialist project briefs.

Examples:

Research and development work: to support your ideas and learning journey

Final work: this can take many different forms and will be detailed in your project brief

Written work: up to an indicative word count of 7,000 words or equivalent for the module (this may include writing in different forms i.e. critical study, essays, creative writing, reports, and reflective journal entries)

Presentations: a choice of live or pre-recorded will always be given

Research and development films up to a duration of 7 minutes

Photo/visual essay: visual research captured through imagery

Living assessment record: your digital learning and assessment record

Student progress review: learning opportunity to review and discuss progress.

Workload

Overall Workload	Level 7
Teaching, learning and assessment	310 hours
Independent study	1490 hours
