Course Overview

Aims

The aims of the programme are to:

- 1) To equip graduates with management skills necessary to manage:
 - people and their performance
 - the business
 - crises and change
 - projects and the associated risksas well as develop strategies to deal with global challenges and the choices facing the business.
- 2) To meet the increasing demand of graduates who want to develop knowledge and skills in the broad areas of management and marketing and boost their marketability by acquiring a Master's qualification.
- 3) To provide students with a programme of advanced and challenging study in the field of management which allows them to build upon existing qualifications and experience in seeking continual professional development.

Course learning outcomes

At the end of the course, students will be able to:

1	Critically evaluate, synthesise and apply advanced and contemporary theories, debates and techniques to a range of complex and open-ended issues, problems and situations
2	Demonstrate a critical, ethical and reflective approach to their professional / subject / work domain
3	Learn interdependently and independently and accept responsibility for subsequent career and continuing professional development
4	Critically apply with a degree of creativity and sophistication, intellectual, transferable and subject / professional skills to a range of complex and open-ended business problems and situations.
5	Make informed judgements and decisions, in areas relating to business and management, in the absence of complete data
6	Effectively undertake an extended, independent project and critically apply postgraduate study skills and academic practices to solve complex problems by which new solutions or actions emerge that affect self and others.

Teaching and Learning Activities

Summary

A mix of lectures, tutorials and online resources are designed to encourage a community of learning which invites and enables all participants to engage in discussions, to be visible, valued and respected for their individual contribution.

Modules at this level will be characterised not only by the inclusion of more advanced knowledge, but also by being more open-ended in the realistic situations in which students are required to identify and tackle problems. The progressive problem-solving philosophy, together with the complementary encouragement of independent learning, will shift the mix of work away from that done in class and towards that done outside.

Your modules

This information is correct for students progressing through the programme within standard timescales. Option modules listed are indicative of a typical year. There may be some variance in the availability of option modules. Students who are required to undertake repeat study may be taught alternate modules which meet the overall course learning outcomes. Details of module delivery will be provided in your timetable.

Full Time, September Start

Assessment and Scheduled Learning and Teaching Activities

The assessment balance and overall workload associated with this course are calculated from core modules and typical option module choices undertaken by students on the course. They have been reviewed and confirmed as representative by the Course Director, but applicants should note that the specific option choices students make may influence both assessment and workload balance.

A standard module equates to 200 notional learning hours, which may be comprised of teaching, learning and assessment, any embedded placement activities and independent study. Modules may have more than one component of assessment.

Assessment

On this course students will be assessed predominantly by coursework with some examinations and practical assessments. At the end of the course, students may choose between Navigating the Future, a dissertation or a consultancy project.

Workload

The number of hours of workload generally equates to 1200 per level for an honours degree or 1800 for a Master's programme, corresponding to the national standard of 10 notional hours of learning for each UK HE credit point.

Overall Workload	Level 7
Teaching, learning and assessment	276 hours
Independent study	1524 hours
Placement	N/A
