If you have questions about fees for this course, contact Fees@leedsbeckett.ac.uk

Timetable
You will receive your full timetable for the year during induction week.

What you will study

Course aims
The MSc Facilities Management course is aimed at people who hold a cognate level 6 qualification in Facilities Management or a related discipline or have substantial experience in industry, being employed in either the Built Environment, real estate, building asset management or Facilities Management sector. Students might be people who are developing their career aspirations or wish to improve their academic knowledge and application of Facilities Management at a strategic level. Students are more likely to be established Facilities Managers or Estate Managers who for personal or professional development wish to acquire a higher formal academic qualification. The course is delivered via web based distance learning and you will be able to engage with your tutors via the VLE. This offers opportunities to people who otherwise would not be able to undertake formal face to face education for reasons of employment, or personal circumstances. For example, students may be required to work elsewhere for periods of time.

Teaching and learning activities
This course is delivered via web-based distance learning. The educational style is “WrapAround” and “Content with Support”. Students are directed to learning resources, VLE, textbooks and external websites. The tutor provides directed study guides “wrapped around” these learning resources. Students are supplied with links and references to this external material and are expected to follow up these links on their own; much as students in a traditional University course are supplied with reading lists and are expected to undertake reading on their own. At times, students may be expected to source their own material, particularly where students are expected to identify relevant law and practice in their own country.
Students are expected to be able to undertake a significant level of independent and self-directed study, for example, being able to source additional material from the Web. These accord with the experience of the tutors; from tutoring on Distance Learning Courses from Foundation to Master’s Degree Level and from tutoring on the DL Undergraduate programme.

- web based material
- project work

- directed reading
- case studies
- problem solving exercises; reflective learning techniques
- computer-assisted learning

This course will feature online learning for any taught sessions.

Course structure

This information is correct for students progressing through the course within standard timescales. If you have to repeat study or take time out during your course, you may be taught alternative modules which meet the overall course learning outcomes.

Level 7
