

Having dementia and cancer created accumulated complexity...

We found having **both** cancer **and** dementia created accumulated complexity in lots of ways...

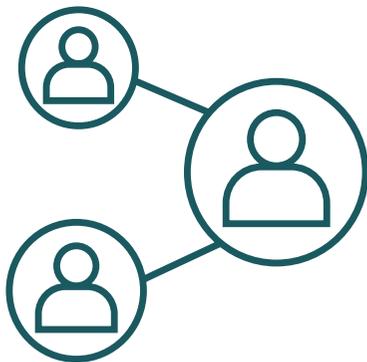

Balancing the needs of the person & the service

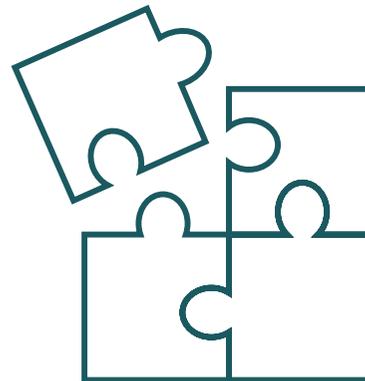

Making decisions about care

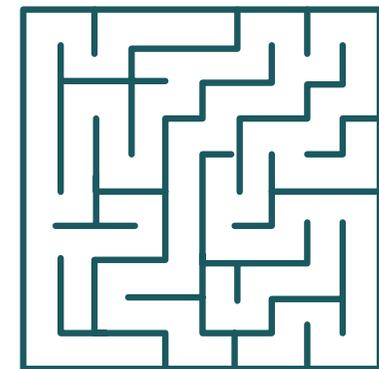

Involving families and supporters in care

Sharing and understanding information

Navigating services

These are findings from the CanDem study. This study was funded by the National Institute for Health Research (NIHR) RfPB programme (project reference PB-PG-0816-20015). The views expressed are those of the author(s) and not necessarily those of the NIHR or the Department of Health and Social Care.]
