

Understanding the cancer care and support needs of people who also have dementia – study findings

People with cancer and dementia **have more appointments** at their GP surgery each month

People with cancer and dementia have a **greater average number prescription medications** per month

These are findings from the CanDem study. This study was funded by the National Institute for Health Research (NIHR) RfPB programme (project reference PB-PG-0816-20015). The views expressed are those of the author(s) and not necessarily those of the NIHR or the Department of Health and Social Care.)
