

# Understanding the cancer care and support needs of people who also have dementia – recommendations for practice

## Asks about, Record and Communicate

that a person has dementia in medical records

Provide  
**pictures, images and personalised written reminders**  
of key information about diagnosis and treatments

Include  
**family members in appointments**  
and information, without excluding the person with cancer and dementia

Try to  
**provide familiarity**  
in staffing and the environment

These are findings from the CanDem study. This study was funded by the National Institute for Health Research (NIHR) RfPB programme (project reference PB-PG-0816-20015). The views expressed are those of the author(s) and not necessarily those of the NIHR or the Department of Health and Social Care.]
