Introduction

External Examiners are required by the terms of their appointment to submit an annual report. The report will be considered in depth during course annual monitoring activity. A record of the University’s responses to examiners’ reports also forms part of the documentation for this activity. It is also used in compiling our annual report on external examining.

Your report will be widely circulated and shared with Students and therefore we ask you not to refer to anyone by name or in a way that allows identification of an individual.

Please complete all sections of the report unless they are not relevant (such as you do not examine Collaborative or Degree Apprenticeship Provision). This report must be **submitted within 28 days of the main Progression and Award Board** and failure to submit within the required timescale may result in termination of your tenure as an external examiner without good reason.

NO EXAMINING FEES WILL BE PAID IF YOU FAIL TO SUBMIT YOUR ANNUAL REPORT.

Academic Standards

Please advise on the Academic Standards for the Programme:

B2) What do you believe were the strengths and weaknesses of the students in general with respect to knowledge, conceptual grasp or application of skills? (required)

The students in general have demonstrated notable strengths in their knowledge acquisition, conceptual grasp, and application of skills within the robotics program. Their foundation in key subject areas is solid, and they exhibit a commendable ability to grasp complex concepts and theories. Furthermore, their practical skills in designing, building, and programming robots have been impressive. However, like any cohort, there are areas where improvement is possible. Some students could benefit from enhanced collaboration and teamwork skills, as the subject area often requires interdisciplinary cooperation. Additionally, a few students might benefit from further development in their problem-solving abilities.

B6) Please provide any further comments to indicate how the course could better prepare students for progression to managerial or professional employment or further study (if applicable)

Firstly, incorporating more real-world case studies and practical exercises into the curriculum could help bridge the gap between theoretical knowledge and practical application. Additionally, promoting internships, or industry partnerships can provide students with valuable hands-on experience and networking opportunities, which are crucial for their transition into the professional world. Moreover, introducing coursework or workshops focused on soft skills such as leadership, communication, and project management could greatly benefit students aiming for managerial roles. Lastly, creating a dedicated career guidance and support system within the program can assist students in identifying their career goals, preparing for interviews, and navigating the job market effectively.

B7) Have you had the opportunity to comment on or contribute to a review of the course including any proposed modifications or enhancements to provision?
(required)
