Collaborative Institution:

Date of Main Progression and Award Board Attended:

Introduction

External Examiners are required by the terms of their appointment to submit an annual report. The report will be considered in depth during course annual monitoring activity. A record of the University’s responses to examiners’ reports also forms part of the documentation for this activity. It is also used in compiling our annual report on external examining.

Your report will be widely circulated and shared with Students and therefore we ask you not to refer to anyone by name or in a way that allows identification of an individual.

Please complete all sections of the report unless they are not relevant (such as you do not examine Collaborative or Degree Apprenticeship Provision). This report must be **submitted within 28 days of the main Progression and Award Board** and failure to submit within the required timescale may result in termination of your tenure as an external examiner without good reason.

NO EXAMINING FEES WILL BE PAID IF YOU FAIL TO SUBMIT YOUR ANNUAL REPORT.

If any boxes are ticked “No” the Dean of School or nominee will be alerted and will oversee the response from the Course Director.

Issues/point for clarity during the year

A6) Did you raise any issues/point for clarity throughout the year? (required)

Yes

A6a) Please expand below how they were/were not addressed: (required)

I have previously asked for more clarity around marking annotations on student submissions. This in my opinion has improved but is still below what I would expect to see on all modules. The use of quick marks could be a good starting point in-line with a designated rubric. At the moment there are ambiguities in terms of how a mark has been derived in some modules and even within module across multiple assessments. I am still also unsure on how student feedback (module and programme review) is gathered as it is quite variable in terms of what is presented to me and the level of feedback that seems to be provided by the students.

Areas of good practice/commendation

A7) Please outline any particular strengths or distinctive or innovative features you have observed in relation to learning, teaching and assessment:

The courses continue to deliver a very contemporary curriculum that is well designed and from what I can see well delivered. The assessments that I have sight of are well designed and are set at the correct level - my comments rom previous years have been addressed in terms of levelness.

Section B

Academic Standards

Please advise on the Academic Standards for the Programme:

B1) Do the Courses and its modules continue to be coherent and generally up-to-date and at an appropriate level to enable students to meet the relevant aims and learning outcomes? (required)

Yes

B2) What do you believe were the strengths and weaknesses of the students in general with respect to knowledge, conceptual grasp or application of skills? (required)

This is hard to say based on the information available. But I would think that the strength of the LB students will be in terms of their multidisciplinary knowledge applied to biomedical and wider biosciences. Having not spoken to any students, I can not accurately gauge their real understanding of their subject - there are some very impressive pieces of coursework on some modules though.

For B4) Some modules fall below what I would like to see in terms of feedback level and depth for assessments.

B3) Are the marking/grading criteria or marking schemes set at the appropriate level of study and have they been consistently applied including internal moderation processes? (required)

Yes

B4) Did students receive adequate and helpful feedback to inform their future learning? (required)

No

B5) In your view please indicate how well you feel the course prepares students for progression to managerial or professional employment or further study? (required)

0= not at all, 10= fully

8

B6) Please provide any further comments to indicate how the course could better prepare students for progression to managerial or professional employment or further study (if applicable)

This is a rather strange question that needs more clarity in terms of what you want and the geographical context. However, based on the graduate prospects of the students leaving these courses I would say that they are equipped with the basic transferable skills needed for graduate employment. I would also say that this could be quite variable based on the large international cohort that seems to be present and if they decide to return to their native countries beyond their studies at LB.

B7) Have you had the opportunity to comment on or contribute to a review of the course including any proposed modifications or enhancements to provision? (required)

Yes

B8) If you have answered no to any of the above or would like to add any further points of clarity, please expand in the box below:

Yes

C4) There was sufficient rigour in the achievement of learning outcomes in professional placements / work-based learning / work experience (where relevant).

Yes
