(a) The operation and conduct of the Progression and Award Board (and/or Module Board meeting you may also have attended).
N/A

(b) The action, if any was required, taken in response to your report of last year. (This will not be relevant if you are examining for the first time.)
N/A As this is my first year of External Examining

(c) The overall performance of the students, in relation to that of comparable levels of work in other institutions.
The work presented to me was of the same/or comparable to levels of work in other institutions where I have previously worked and where I currently work.

(d) The strengths and weaknesses of the students in general with respect to knowledge, conceptual grasp or application of skills.
I received a good spread and range of grades for the dissertations which I saw. It was evident from reading through each of the dissertations that there was marked variability in the way students engage with the academic literature with some students at the high end fully understanding the nuances of referencing which was countered by those at the lower end who evidently struggled with utilising the relevant sources and referencing correctly.

(e) The standards of the structure, organisation, design and marking of all examination papers and/or other forms of assessment.

The standards of marking on the dissertations was very thorough with clear, useful and individualised feedback given to each student. The mark awarded reflected the feedback.

(f) The curriculum, teaching or resourcing of the programme of study as indicated by the performance of the students in the assessment.

From examining the dissertations, it is evident that students have access to a wide range of resources which is reflected in the contemporary nature of the dissertation topics selected by the students.

(g) Comments on the use of My Beckett (Virtual Learning Environment) within the course (if applicable).

From looking at the references used in the dissertations, students have access to a wide range of contemporary resources.

(h) Module content, consistency of modules and module assessment across the course and the achievement of learning outcomes. (You may be asked by your School to provide detailed comments on the modules that you examine.)

For the dissertation, the module content is relevant with clear Learning Outcomes.

(i) Areas of student/staff engagement in teaching and learning, scholarship, research or professional practice.

From examining at the dissertation titles presented to me, students are being exposed to the latest developments and thinking in this field which is testament to the course team as it is such a fast moving subject area.

Recommended sample sizes at Leeds Beckett University are as follows:				
<p>a) Samples should be determined by a square root of cohort size, no smaller than 6, no larger than 15. However it should be borne in mind that not all work is assessed in a way that makes a square root sample possible and allowance should be made. For example in subjects such as the performing arts where there may be a requirement for an external to come and view a performance instead, or to visit the exhibition of art work.</p> <p>b) Samples to include all classification categories, and it is helpful to concentrate around the boundaries to include some fails.</p> <p>c) Samples to consist of internally moderated work, clearly evidencing the moderation process.</p>
